THE TEAM KENTUCKY ADVANTAGE

As our name says, Team Kentucky works cohesively toward its common goals. State agencies, local economic developers and utilities work together on site selection, planning, permitting, workforce sourcing, training and more to help your company quickly establish, open and operate successfully for the long term.

Speed to Market:

Time is money for companies and Team Kentucky prioritizes speed to market. By maintaining a robust selection of project-ready sites and buildings across the state, Team Kentucky helps companies quickly get up and running and down to business.

Prime Location Saves Money:

Kentucky's borders lie within 1,000 km of two-thirds of the U.S. population, making the state a gateway between the U.S. South and Midwest, and providing easy access to the Northeast and Atlantic Seaboard. Kentucky's central U.S. location underpins its unparalleled logistics and distribution industry, a major benefit for manufacturers. Kentucky offers three international air-cargo hubs – UPS, DHL and Amazon Air, a strong FedEx presence – which give companies certainty their goods will arrive anywhere globally, on time, every time.

Low-Cost Electric, High Quality of Life:

Our low costs of conducting business – including among the lowest prices nationally for industrial electricity and our high quality of life – help make Kentucky a top choice for corporate expansions and new-business locations.

Join Team Kentucky at ced.ky.gov.
