Hello from the State of Mississippi

A growing list of global companies call Mississippi home. Centrally positioned in the country's fastest growing region, Mississippi provides industries with a strong competitive advantage, including a highly productive workforce, a welcoming business climate and a strong network of research university partnerships.

Mississippi is proud of its ratings in areas that matter to business, including overall cost of doing business, speed of project permitting, business incentive programs, and energy availability and costs.

We are also investing in our people through our four research universities and community colleges offering specialized programs in workforce development tailored to the needs of industry. In addition, the Mississippi Works Fund provides additional training resources for new jobs created through foreign direct investment and other economic development projects in Mississippi.

Mississippi and its robust infrastructure and available site inventory make the state a prime location for today's companies searching for tomorrow's business solutions.

In Mississippi you can confidently invest in a state with a deep and consistent commitment to business, while your teams can enjoy an unmatched quality of life, including southern hospitality and cuisine, endless outdoor and entertainment opportunities and a low cost of living that makes all this accessible.

We welcome the opportunity to meet with you and share more!
